January 9, 2026

Letter from The Founder.

Dear Friends and Supporters,

2025 was a year of tremendous growth, not just of trees but of courage, responsibility and hope.

Because of your support, hundreds of young pupils planted their very first trees, learned climate leadership and began seeing themselves as guardians of their environment.

Every seedling in this report carries your belief in a better greener future.

Thank you for supporting and believing in Delugees.

**With Deep Gratitude,
Shem Mutulu.**

In 2025, Delugees worked hand in hand with pupils, teachers, volunteers and communities across Kenya.

What begins in the classroom grows into action in the soil, empowering children to become caretakers of their environment and leaders of tomorrow.

Greening Schools

Climate Education

January 9, 2026

Climate Education in Action.

Before children plant trees, they learn why the trees matter.

In 2025, Delugees integrated climate education into school life by helping pupils understand climate change, environmental responsibility and their role as young stewards of the earth.

Through classroom sessions and creative activities such as climate essay writing, learners connect global challenges to their own lived experiences.

2025 Impact at a Glance.

5,000 Trees Planted.

3,000 Pupils Reached

12 Schools Engaged

50+ Volunteers Mobilized

www.delugees.org

January 9, 2026

Jane, a Grade 7 Pupil at Ngarariga Primary School, planted her first tree this year.

“I feel happy I have planted a tree today and it makes me proud because I am protecting the environment and my school”

Because of you, Jane is now climate conscious and a climate leader.

Teachers leading pupils to
Plant Trees.

Teaching pupils understand
that climate action starts
with them and it's a
community responsibility.

DELUGEES
Knowledge & Action

**DELUGEES ESSAY CONTEST QUESTION
FOR PUPILS - 2025**

SUBMISSION INSTRUCTIONS

1. Essays to be hand-written (1-2 pages max) and submitted through the class teacher to the Delugees Environment Organization on the day of tree planting in their school.
2. Time limit: 30 minutes.
3. Prizes: Exciting awards for the top 3 essays.

Be creative, bold and let your ideas shine.

Pupil's Name: JANE NTERI GITHINTI

Grade: GRADE SEVEN

School: NGARARUA COMPREHENSIVE SCHOOL

Essay Question
If you could change one big environmental problem in your community or school, what would it be, and how would you lead others to solve it?

In kibera some few day ago there was a landslide. It caused many damage like people died, home went damage and farms here

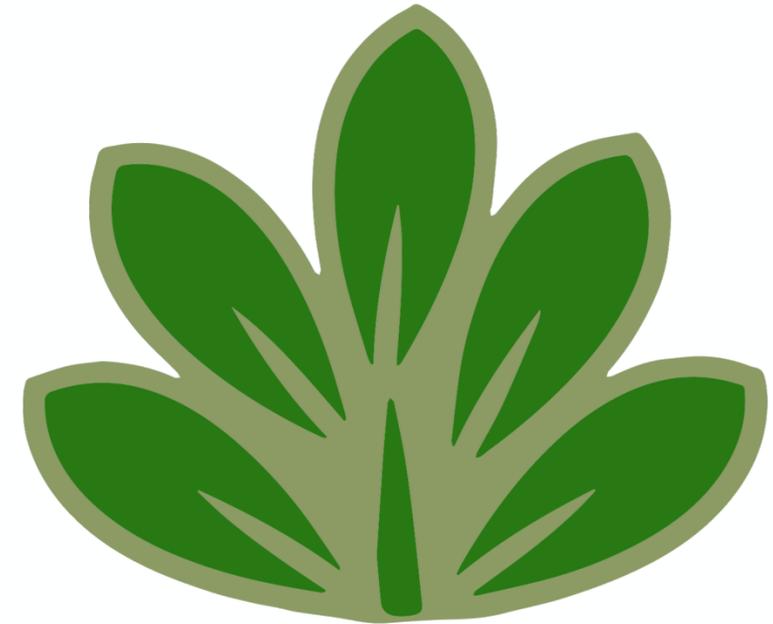

www.delugees.org

January 9, 2026

Looking Ahead to 2026

- ✓ Expand to more schools.
- ✓ Deepen Climate education.
- ✓ Strengthen tree survival monitoring.

DELUGEES

Knowledge & Action

Our vision remains clear. Empower Children, Resilient Communities and Restore Ecosystems.
